

## Packaging Products

### Static Shielding Bags

Metal-In, Metal-Out

### 81705 Series Bags & Film

Qualified to MIL-PRF-81705E Type III, Class 2

### Cushion Bags

### Moisture Barrier Bags

Foil-High Barrier, Aluminum-Low Barrier

### Other Packaging Products

Humidity Indicator Cards, Desiccant

## Workstation Products

### Wrist Straps

Single or Dual, 5', 6', 12' Fabric, Metal, Disposable

### Foot Grounders

Standard, Cup, Heels, Disposable

### Table and Floor Mats

Rubber (soldering), Vinyl Dual or Three Layer all widths, Up to 50'

### Ionizers

Benchtop, Overhead, Air Gun

## Instrumentation Products

### Test Instruments

EM Eye - ESD Event Meter

### Workstation Monitors

724, WS Aware

### Equipment Monitors

Ground Master

## ESD Vacuums

Electronic Service Vacuum

## SMP Static Management Program

### The Next Generation of ESD Process Control

SCS Static Management Program (SMP) continuously monitors your ESD process control system throughout all stages of manufacturing. SMP captures data from SCS workstation, equipment and ESD event continuous monitors and provides a real-time picture of critical manufacturing processes. All activity is stored into a database for on-going quality control purposes. SMP allows you to pinpoint areas of concern and prevent ESD events. Quantifiable data allows you to see trends, become more proactive and prove the efficiency of your ESD process control system.
