**NEW STATIC CONTROL PRODUCTS**

**PACKAGING PRODUCTS**

- 1000 Series Metal-In Static Shielding Film Rolls
- Dri-Shield® 2000 Series Moisture Barrier Film Rolls
- MIL-PRF-81705E Film Rolls

**WORKSTATION & GROUNDING PRODUCTS**

- 2369 Dual Conductor Adjustable Wrist Strap, with 5’ Coil Cord
- 1964 Series Conductive Vinyl Floor Mats
- 770043 Multi-Ground Hub
- 770115 Ground Cord, 10 mm Stud, No Resistor, with Ring Terminal
- R3 Series 2-Layer Rubber Worksurface Mats

**INSTRUMENTATION & TEST PRODUCTS**

- 770724 724 Plus Workstation Monitor
- 770760 Resistance Pro Meter Kit
- 770718 Air Ionizer Test Kit
- CTM048-21 EM Eye - ESD Event Meter
- 770050 SMP Diagnostic Kit

**Static Management Program**

**MANAGE YOUR ESD PROCESS FROM...ANYWHERE!**

SCS Static Management Program (SMP) continuously monitors your ESD process control system throughout all stages of manufacturing. SMP captures data from SCS workstation, equipment and ESD event continuous monitors and provides a real-time picture of critical manufacturing processes. All activity is stored into a database for on-going quality control purposes. SMP allows you to pinpoint areas of concern and prevent ESD events. Quantifiable data allows you to see trends, become more proactive and prove the efficiency of your ESD process control system.
