

Iron Man™ Plus Workstation Monitor

Protect your circuit boards from electrostatic discharge and electrical overstress

- **Single Workstation Continuous Monitor**

Continuously monitors the path-to-ground integrity of an operator and conductive or dissipative worksurface and meets ANSI/ESD S20.20 in accordance with ESD TR1.0-01-01.

- **Electrical Overstress (EOS) Detection**

Alarms if overvoltage ($\pm 5V$ or less) from a tool such as a soldering iron or electric screwdriver is applied to a circuit board under assembly.

- **Operator Body Voltage Detection**

Alarms if the operator generates or comes in contact with a voltage that would be dangerous to an ESD susceptible item.

- **Digital Signal Processing Technology**

Applies a low test voltage to the operator (0.40V) for the handling of sensitive components.

- **Miniature Size (0.85" H x 2.4" W x 2.6" L)**

Uses minimal workspace and includes mounting tabs for installation underneath table tops.

- **Use with Dual-Wire Wrist Strap (not included)**

- **Assembled in the United States of America with Globally Sourced Materials**

Technology no one else has!
