DETERMINING THE CORRECT SIZE BAG FOR YOUR APPLICATION:

Width is measured from inside seam to fold.
 Length is measured from the top edge to the seal on skirt.
 Opening is in the "width" dimension.

Bag Width = Item Height + Item Width + 1 inch (25mm)
 Bag Length = Item Height + Item Length + 1.5 inches (38mm)

This is a guide, it is not intended to be exact for your product. As always, ask for a sample before determining your purchase.
